- Asp.NetCoreMVC (08/2021 until 12/2021)
- GNU/Linux
- Git

Languages

English

Lower Intermediate (But I'm
studying hard to learn).

WELLISON BERTELLI

Web Developer - Full Stack (Full Cycle)

(At the moment, specializing in to Back-end with Java)

I'm developer and enthusiast of programming and technology world, I have devoted myself to this subject since 2021, with CONSTANCE and INTENSIVE every day hard work for my dream. I have a degree in "Computer Systems", this college is equivalent to "Associates Degree" with 2 years of duration. And currently I'm studying "Systems Analysis And Development" at the university.

In the moment I have dedicated my studies in to Java language and the Spring Ecosystem, because I want specialize in Back-end from Web. And than I have very knowledge of ReactJs (Facebook Front-end Framework) and MySQL Database, but I don't study these technologies anymore.

I'm enthusiastic of GNU/Linux Operating System, this is my development environment in the daily lives. I use this OP because the three GPL freedom ensure the freedom of user, allow me to do personalize and settings the environment without difficulty or problem, this is different in to Windows black box.

I come from humble origins, dreamer and determined. I'm confident that in the future these methods combined will hard work for best world and community improvements using technology. I running and following with the philosophy "Kill one lion everyday day", believing that persistence and perseverance is the key of success. Let's do solved of problems using technology together? ^^

Experience

Salto - São Paulo,
Brazil

Nov 2018 - Nov 2020
(2 years)

Almoxarife (Storekeeper)

Clemont Equipamentos e Montagens Industriais LTDA

- Responsible for all internal factory logistics strategies.
- Receipt and dispatch (send) of materials related to automation, mechatronics and metallurgical.
- Receipt and dispatch (send) of tools related to automation, mechatronics and metallurgical.
- Storage and control of the same cited here.
- Inventory control of the items mentioned here and consumables.
- Internal control over the use of the items mentioned here, and evaluation of "remaining" materials for use in future projects.
- Preparation of packing lists containing the items that are taken to the external works.
- With the help of an Excel Spreadsheet.
- Among other activities (Small business, ended up doing a little bit task of everything).

Higher Education

Salto - São Paulo,
Brazil

Feb 2023 - At the
moment

Systems Analysis And Development

Centro Universitário Nossa Senhora do Patrocínio (CEUNSP)

A College Degree at Technologic "Systems Analysis And Development" specialized in development and programming of computer systems (full life cycle), I was in doubt between this one or "Computer Science" much more generic (abstract) and has a more long period, and went by this criterion that made me choose "Systems Analysis And Development" because it's more specialized and specific of my context, because I made this knowledge at the "Community College", furthermore also is more quickly of conclusion and to do achieve my goals of become Doctor of Technology!

Community College

Salto - São Paulo,
Brazil

Feb 2021 - Dez 2022
(2 years)

Computer Systems

Instituto Federal de Educação Ciências e Tecnologias de São Paulo (IFSP)

A course geared towards programming and development to the Web, was in first year with focused in the stack of technologies to Back-end, and in second year with focused in the stack of technologies to Front-end, reaching from the requirements gathering with users / clients, analysis (Modeling of use case), prototyping (low-fidelity, medium-fidelity, and high-fidelity), project (Technologies), in to development side itself, such as those the personal studies and than I took part of the congress and actions at the institution for adding more value to learning.
