## WELLISON BERTELLI

### Web Developer - Full Stack (Full Cycle)

(At the moment, specializing in to Back-end with Java and Spring Ecosystem)

I will help my team conquer everything; not a single bug will be left in our path.

I can solve any problem delegated to me. If I don't know how, I will seek out the necessary knowledge for a performant and elegant solution, in the shortest time possible and with good maintainability.

I am not a proponent of technologies, paradigms, or programming languages. I can easily adapt to the stack used by the team on both ends of the cycle.

I am open to learning and adapting to the specific needs of the project.

Shall we solve problems by applying technology together? ^^

## Experience

Salto - São Paulo, Brazil

Nov 2018 - Nov 2020

### CEO:

Luciana Iorio

[clemont@clemont.com.br](mailto:clemont@clemont.com.br)

+55 (11) 4021-5463

### Almoxarife

#### Clemont Equipamentos e Montagens Industriais LTDA

- Responsible for all internal factory logistics strategies.
- Among other activities (Small business, ended up doing a little bit task of everything).
- More Information: <https://www.wellisonbertelli.com.br>

**Reason of my resignation:** The COVID-19 pandemic dramatically reduced service demands.

## Volunteer work

Salto - São Paulo, Brazil

Mai 2022 - Jun 2023

(one-year term)

### Coordinator:

Francisco D. Garrido

[diego@ifsp.edu.br](mailto:diego@ifsp.edu.br)

+55 (11) 4602-9196

### Committee CEIC - Member

#### Federal Institute of Education Science and Technology of São Paulo (IFSP).

- The CEIC (Committee for the Development and Implementation of the Pedagogical Projects for the Technical Course in Computer Science) is an internal committee at IFSP responsible for discussing and defining the curriculum for the entire course (school program), among other responsibilities.
- To decision-making process, the committee values the input of students, and for this, a technical student is needed to represent all.
- Official document appointing the members: [Click here](#)

## Bachelor's Degree

Salto - São Paulo, Brazil

Feb 2023 - At the moment

### Coordinator:

Luis R. Albano Bueno

[luis.silva@ceunsp.edu.br](mailto:luis.silva@ceunsp.edu.br)

+55 (15) 98161-0694

### Systems Analysis And Development

#### Centro Universitário Nossa Senhora do Patrocínio (CEUNSP)

- A College Degree at Technologic "Systems Analysis And Development" specialized in development and programming of computer systems (full life cycle).
- I was in doubt between this one or "Computer Science" much more generic (abstract) and has a more long period, and went by this criterion that made me choose "Systems Analysis And Development" because it's more specialized and specific of my context.

## Associate's Degree

Salto - São Paulo, Brazil

Feb 2021 - Dec 2022

### Coordinator at the end:

Francisco D. Garrido

[diego@ifsp.edu.br](mailto:diego@ifsp.edu.br)

+55 (11) 4602-9196

### Coordinator at the begin:

Reinaldo do Valle

[rvallejr@ifsp.edu.br](mailto:rvallejr@ifsp.edu.br)

+55 (11) 4602-9191

### Computer Science, but Associate's level

#### Federal Institute of Education Science and Technology of São Paulo (IFSP).

- Generic course as it covers not only Computational Fundamentals and Essentials but also:
- Cybersecurity (Cisco Systems - NetAcad platform).
- Cryptography and Hashing Algorithms.
- Network Infrastructure and its protocols (OSI Layers).
- Operating Systems and how they operate at a low level (Scheduler, etc).
- Full Lifecycle of a web application:
- Reaching from the requirements gathering with users / clients.
- Analysis (Modeling of use case).
- Prototyping (low-fidelity, medium-fidelity, and high-fidelity).
- Project (Technologies, Architecture, and Design).
